Famous Empty Quarter Tours from Riyadh

Rub al Khali is a big desert made of sand. It is the biggest one on Earth! It covers a lot of land in the southern part of the Arabian Peninsula and is in countries like Oman, Saudi Arabia, the United Arab Emirates, and Yemen. A long time ago, an explorer named Bertram Thomas went on an adventure in this desert. You can go on a fun trip in a special type of car called a 4x4. You can even camp outside under the stars and watch the sun come up over the big dunes. The Arabic name Rub al Khali means “empty quarter” because it is a very big desert with lots of sand. It has been hard for people to travel through it for a long time because it is so big and difficult to survive in.
