## **Pyramids and the Step Pyramid from Port Said Port**

You will enjoy one of the best (and most important) excursions in Egypt: a tour of the pyramids and the Step Pyramid from Port Said. You will be able to visit the pyramids—an engineering and astronomical achievement up to this moment. Astronomers have been unable to explain how the pyramids were built with such astronomical accuracy, however, without the availability of modern theories and tools that we use now (to discover the locations and trails of stars and planets).

Located around 59 feet (18 meters) above the earth, the north side of the Great Pyramid is where the entrance is found. From there, a sloping tunnel descends into the inner masonry of the pyramid, past the rocky soil that supports the building and terminates in an incomplete subterranean chamber. You will be able to take many beautiful pictures with the Great Sphinx, characterized by its structure built in the shape of a lion's body and human head. You will visit the Saqqara area to see the step pyramid, which was constructed from six mastabas; this Step Pyramid is one of the most famous (and top-visited) pyramids in Egypt.
