### Day tour to Pyramids from Cairo airport

When you arrive in Egypt, you will be picked up from the airport and driven to the first stop on your tour in an air-conditioned vehicle by your private tour leader.

## The Giza Pyramids:

One interesting fact about the Giza pyramids is that if the stones were cut into 30 cm thick slabs, they could be used to make a meter-high wall around France. If it was sliced into a 6 cm wide rod, a road could be created up to a quarter of the way to the moon. When your tour concludes at the three known pyramids, you will have your quad biking safari trip in the deserts of the pyramids, then go to visit.

## Dahshure:

It took 14 years to build the leaning pyramid, and it appears that Sneferu did not like it, so he chose to build the red pyramid using the experience gained by its engineers while building the leaning pyramid. So he chose the location for his pyramid, where he was buried, roughly 2 kilometres north of the leaning pyramid near the town of Dahshur.

Then you'll have lunch at an excellent restaurant with Egyptian-inspired cuisine. Then we'll take you back to your drop-off spot, where we'll conclude our service.
